

For more than 30 years IMDC has been a leading consultant in Flanders, specialised in the execution of national and international water related engineering and consultancy projects. At this moment we work with 90 highly qualified employees on projects integrating scientific research with hydraulic engineering. IMDC acquired a vast experience in the field of marine and estuarine systems, dredging technology, coastal engineering, ports and offshore structures, river basin management, waterways and inland navigation, hydraulic design, environmental studies and in situ measurement techniques. Since 1995 IMDC is part of the Tractebel Engineering Group.

INTERNSHIP / THESIS

(m/f)

IMDC offers thesis support and internships.

Internship:

Do the activities of IMDC attract you and is IMDC the ideal company for your internship? Does your internship last at least 3 weeks (for students of Belgian colleges of higher education/universities) or 3 months (for students of non-Belgian colleges of higher education/universities)? Do not hesitate and send us your CV and cover letter and clearly indicate the desired internship domain and period.

Thesis:

Do the activities of IMDC attract you and is IMDC the ideal company for your thesis? Chose one of the thesis subjects on our website or propose an interesting subject yourself. Do not hesitate and send us your CV and cover letter with a clear mention of your chosen thesis subject.
